

SCRUBAIRE 2000

The SCRUBAIRE 2000 has been designed to be an easy to use, easy to clean product providing air scrubbing duties within or close by a working area.

The purpose of the SCRUBAIRE is to draw in contaminated or polluted air through a series of filtration, returning clean air at low level back to the environment.

The standard filtration setup will filter particulates to 5 microns.

Technical Specifications

Specifications		Scrubaire
Volume M ³ /Hr		2000
Power supply		110/230v
Dimensions	Height	1265mm
	Width	585mm
	Length	585mm
Weight		61kg
HEPA Filter	Height	385mm
	Width	385mm
	Length	292mm
Castors x 4 (2 x braked)		100mm
Manufactured from 6mm and 5mm ABS thermoplastic sheet bonded to form triple welds.
