

ASTROCAB MATERIAL AIRLOCK

The Astrocab Material Airlock gives you ease of access to and from the work area for equipment and bagged waste, with reinforced flooring panels and ramps. Supplied with hose connections through the wall panels with a hand sprayer to wash the bags along with a waste water filtration unit (Aquarius Water Management Systems, see separate documentation).

The Astrocab Material Airlock comes supplied with 2 double asymmetric door panels for security as each end of the unit with flap doors in the centre compartment. The 3mm thick clear PVC strip flaps simply hook over their fixings on the panel (no tools required) and roll up after use.

As with all of our Astrocab panel systems the units are modular, and the Astrocab Material Airlock comes in 2 or 3 Stage (or even more stages to suit your requirements). It is an ideal solution for larger jobs where there are space constraints for mobile units.

We have manufactured many different sizes of Astrocab airlock systems for our clients throughout the UK and Europe, so if you have a specific requirement, please contact us. Your companies logo can be engraved on the wall panels at no additional cost.
